

Jardin Round Obelisk, 7'

Add height and drama to your garden with the Jardin Round Obelisk trellis. The graceful lines and heirloom finish add a touch of romance to your landscape, and it's perfect for supporting flowering vines like clematis, morning glories and climbing roses.

Assembly

Step 1. Line up the pieces of the trellis based on the height of the crossbar, as shown in Figure 1. To help with assembly, think of them as pieces A - E, with A being the top piece and E being the base piece.

Figure 1

Step 2. Choose a place in your garden for the trellis. Take base piece E and push its legs into the ground. We recommend up to 12" deep for good stability, especially with heavier vines.

Step 3. Take trellis piece D, and insert the legs into piece E. Slide the legs down until they fit snugly into place.

Step 4. Repeat Step 3, inserting piece C into piece D, piece B into piece C, and finally piece A into piece B. Your obelisk trellis is now ready to use!

Care Instructions

This trellis has a clear, weather-resistant powder coating that has been hand-painted to resemble aged metal. If the finish is nicked or scratched, touch it up with an exterior-grade metal paint to prevent rust.
